PROFILE

A frontend developer/system administrator in a medium-sized consulting company, seeking a more challenging position and is ready to use experience to achieve more goals. I am to consider the position of a technical support, web-master or frontend-developer.

ACHIEVEMENTS

- Achieved a 2-fold increase in website speed and reduced the cost of maintaining rented servers by 30%.

- Development and creation of an online learning system architecture for both long-term courses from 9 months to 2 years, and short-term workshops from 2 to 6 months on the Getcourse platform.

- Implementation and support of product payment systems for clients from all over the world.

- Selection and technical support of foreign hosting in Latvia and Serbia. Transferring from test mode and launching other web resources on them.

- With the help of SEO optimization, I was able to increase the number of visitors by 20%.

SPECIAL SKILLS

- Experience of working with CRM systems.

- Experience of working with CMS systems – Drupal, Wordpress, Tilda, OpenCart, Bitrix.

- My stack – HTML, CSS(float, flex, grid, bootstrap 4-5), JavaScript Vanilla/Angular, TypeScript, SQL. Basic knowledge – PHP.

- Familiar at the advanced user level with software such as Microsoft, Adobe Photoshop, Sony Vegas, Power BI, Perfect Pixel, Figma, Adobe Illustrator, Google tools.

- Experience in the field of SEO promotion.

- Experience in hosting support.

- Windows system administration experience - Proficient in installing and configuring Windows systems, managing Group Policies, setting up local networks, and troubleshooting system performance and network issues.

- Experience with Linux Ubuntu installation, configuration, and system management.

- Analysis of web resource data using Google analytics. Working with SQL databases.

EXPERIENCE

- November 2023 - November 2024 website maintenance contract – technical support/web-master
  - Supporting the website
  - Enhancing internal and external functionality
  - Integrating with external resources – payment systems, CRM systems, chat systems
  - Configuring and providing access for company employees
  - Developing access systems (electronic catalogs) and client discounts
  - Participating in site methodology development and SEO
  - Advising on site migration or external module integration
  - **Tech Stack:** HTML, CSS, Vanilla/ Angular JS, PHP 5.6 (basic), Git, MySQL, GPT, CMS Made Simple, Google Tools(GTM, Analytics), Yandex Tools(metrika).

- May 2021 – November 2023 Coaching institute – Frontend developer/system administrator
  - Managed technical support for clients and staff, ensuring functionality of online platforms and educational materials.
    Configured servers (MySQL, MariaDB), maintained office and network equipment, and administered Windows, Mac, and Linux systems.
    Supported hosting in Latvia, Serbia, and Russia.
    Implemented software solutions (Power BI, HubSpot, Notion), integrated payment systems, and enhanced security policies.
    Developed and maintained web resources (WordPress, Tilda).
    Organized office infrastructure in Belgrade, managing equipment, repairs, and software setups.
  - **Tech Stack:** HTML, CSS (Bootstrap), Vanilla/ jQuery JS, PHP 5.6-8.0 (basic), CMS Word Press, CMS Tilda, CMS bitrix-1c, Git, MySQL, MariaDB, Windows 8-10, Windows Server 2016, macOS 11-13, Linux Ubuntu 20 FF, Acronis, Google Workspace, Google Tools (GTM, Analytics), Yandex Tools(metrika), GPT.

- August 2019 – May 2021 LLC Auto-component (chain stores over 25 stores) – Junior frontend developer
  - I joined Auto-Component (a division of the auto giant Carville) as a Junior Web Developer and also took on the role of Deputy Head of the E-commerce Department. In addition to the main responsibilities of website development and support, I handled IP telephony within the department and maintained PCs for the e-commerce team (about 25 people) during the COVID period, including:
  - Setting up, installing, and troubleshooting Windows
  - Installing necessary programs and fixing any issues that arose during their use
  - Configuring account permissions
  - Managing local network connections and access to server files

- o Organizing remote access to desktop PCs

- o **Tech Stack:** HTML, CSS, Vanilla/ jQuery JavaScript, PHP, SSL, FTP, HTTP/HTTPS, CMS Bitrix-1c, Google Tools(GTM, Analytics), Yandex Tools(metrika), Bitrix24, Jira, Slack, SIP telephony, Windows 8-10, MS Office, Git.

- January 2018 – August 2019 LLC Truck Empire Service (chain stores over 16 stores)– web-developer

  - o I handled technical support for customers on the website, including developing pre-written response scripts, and addressed issues and errors encountered by clients.

  - o In the office, I assisted the system administrator with maintaining employees' work PCs (installing and configuring Windows, setting up accounts, installing and fixing software issues, selecting parts for replacements, and assembling PCs for new employees) and other office equipment. I also managed the local network, configured and provided network access.

  - o For reporting and quick response to new requests, we used Helpdesk software.

  - o **Tech Stack:** HTML, CSS, Vanilla JavaScript, SSL certificates, FTP, HTTP/HTTPS,CMS Bitrix-1c, CMS WordPress, Google Tools(GTM, Analytics), Yandex Tools(metrika), Bitrix24, Acronis, Helpdesk, Windows 8-10, MS Office, LAN/WAN.

- November 2013 – July 2017 business owner (anime-shop) - owner

QUALIFICATION
2008-2012 Nizhny Novgorod State University named after N.I. Lobachevsky - bachelor
